Energy Atlas. Facts that have impressed me.	Votes
The fact that impressed me the most is that China despite of being the largest consumer of them all is still surpassed by a small country, Iceland, on the consumption per capita. By Danae GR	101
I'm impressed by the fact that even since 1973, US had the value of 1.97thousand TWh. Catherine Gr/It ;)	76
One thing that impressed me is that 2 countries almost have 50% of the total electricity production globally	72
I was very impressed by the fact that Iceland despite being a relatively small country, has the most energy consumption. Maria Gr	70
The fact that impressed me is that China and India are some of the countries whose used amounts for the TEG are extremely high!Nefeli S,GR	69
I am very impressed by the fact that Greece has really improved at using renewable sources of energy. Alex X. GR	58
I got impressed by the fact that China and India share the same amount of fossil fuels to produce electricity. Angelos D. GR	54
the fact that impressed me the most is that Lithuania has the most share of nuclear in electricity. By Nick GR.	45
I got impressed of the energy amount that is spent from China, USA and India and how less is the use of renewable sources of energy.Vaggelis.GR	39
I am so impressed by the fact that electricity production is connected with people living in China and the United States.These countries together account almost the 50%of total production.This rate is extremely high for the earth electricity production!.Irene GR	35
In my opinion the most significant fact is that electrification rates have a serious conflicts on per capita consumption levels.NataliaGR	35
I am impressed that United States and China are half of the production of electricity and that some other countries are really low. Kaic F.SP	35
I got impressed by the fact that Japan uses more fossil fuels to produce electricity than China, even though China consumes a lot more energy. Klaidi GE	34

The fact that impressed me the most is that European countries have bigger share of nuclear energy than the US and China combined. Paulos Rus. GR	21
The Fact that impressed me is that China's People's Republic used more electricity generation than United States.(US)By Paolo AL.	20
I am impressed by the fact that Brazil uses the same amount of nuclear energy as China, even though China is a country with way more popullation. Alex X. GR	20
I was really impressed with the fact that most European countries have a bigger share of nuclear energy than the U.S. and China. Alex.B GR	20
The fact that impressed me is that the amounts (about 60%) used for the Total Electricity Generation are quite high. Nefeli S, GR	15
I am impressed by the fact that Greece shares no nuclear power compared to other European countries. KlaidiGR	8
What really impressed me was that even though China consumes so much energy, its per capita consumption is so low compared to other countries. Estela GR	7
I got impressed by the fact that the energy consumption per capita on Iceland is higher than any other European country. Alex X. GR	4
FACTS TO COMMENT. The global electricity generation. The 3 countries that are at the top of electricity generation/consumption. The electricity consumption per continent. The electricity consumption in your country. The electricity consumption 'per capita'. The share of Fossil Fuels in Electricity Production in your country. The share of Renewables in Electricity Production in your country. The share of Nuclear in Electricity Production in your country, Energy Poverty.`	3
I am impressed by the fact that China and United States are almost 50% of total production and Japan isnt in the top 3 countries that produce the most electricity . Alex.Mpk.GR	3
I am so impressed by the fact of that China was able to double its consumption in just 7 years (2005-2012) and surpass the previous leading consumer that way and also that China is now near having twice as much as the second biggest consumer (U.S.A.). (By Alex P. GR)	2
The fact that gave me the bigger impression is that China and United States produce the most electricity and Japan does not produce as much electricity as I thought . Angelos GR	1

What impressed me the most is the fact that Greece does not use nuclear energy at all compared to other countries. EvaGR	1
What impressed me while reading the article, was the fact that the high electricity production in countries such as India, is not as high in electricity consumption per capita. MariettaGR	0
One thing that also amazed me, is the fact that just ten countries are responsible for the use of more than the two-thirds of global electricity output. MariettaGR	0
It impressed me that Brasil produces more electricity than France because France is one of the best developed countries ! Angelos GR	0
